

## Shirnsluckyrescues CRETE

The rescue of a parrot, 5 chicken and 12c ats need for the upcoming winter a shelter against the storms, rain, cold and earthquakes, in the new house!

These animals were living together under an fenced in carport in the previous house. To build a carport construction in the new garden, makes no sence. It need a metal construction, that can be removed, but is also heavy enough, not be blown away by the wind. Enough light for the parrot and build in beds for the chicken and cats.

A construction similar to this costs about 1500 euro. Extras not included.
