

Health Us Nepal, is **an NGO based in Humla** (Nepal), one of the most isolated and impoverished regions in the world.

Our **mission** is to bring health assistance to its inhabitants: more than 50,000 people who live in a forgotten area in the middle of the Himalayas and who have little access to quality health assistance.

_____^_____

WE EXIST TO BRING HEALTH

The heart and soul of Health us Nepal is Marc, a 29 year-old doctor born in Humla, Nepal, who was adopted and brought to Spain when becoming 6.

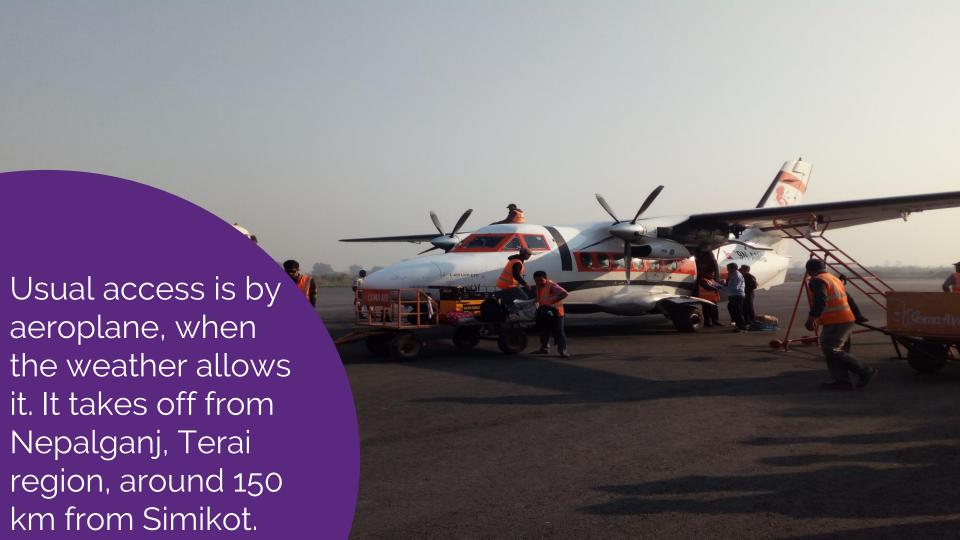

In 2000, at 18 years old, he gets in touch with his origins for the first time and decides to return there every year to help with his own means.

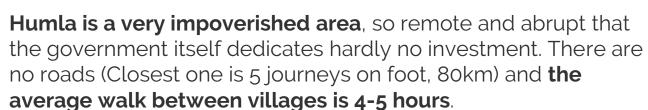

After spending a gap year in there, he chooses to leave his comfortable western life and walk the extra mile: he establishes himself permanently in Simikot, a village in the middle of the Himalayas, and founds Health us Nepal.

_____^____^

A VERY PERSONAL PROJECT

HUMLA DISTRICT 81°45'0"E 81°52'30"E **Map Locator Pharmacy & Primary Health-center** Humla is one of the Kumlika's Clinic remotest Nepal Raya districts, there are no roads and the average height is 3.500m 82°0'0"E 82°7'30"E 82°30'0"E ries and names shown and the designations **Map Created** 3.5

The capital, Simikot, is is above 3,000m, with mountains around between 4-6.000 m. high. Merciless temperatures hinder growing crops, affecting nutrition, generating serious malnutrition diseases.

Humla's life expectancy rate is below Nepal's average, only **58** years old, being its Human Development Index (HDI) only **0,37**. (Germany **0,92**; India: **0,6**).
